

MILTY

Milty

Milty products have evolved and refined over time resulting in truly fantastic products. Through thoughtful design and intuitive handling, all Milty products are exceptionally easy to use.

Zerostat 3

Effective at neutralising static charges on virtually any surface without the need of sprays.

The Zerostat 3 is highly rated for its ability to improve the sound quality of records and CDs by removing static. The Zerostat 3 incorporates a unique Piezo Crystal device which generates a positive electrical charge of ions with one gentle squeeze of the trigger, and a negative charge on release of the trigger so cancelling the charges on the disc. Constructed from durable hard plastic, it requires no batteries or refills and is a long lasting alternative to cleaning brushes.

MI0060M	ZEROSTAT ANTI-STATIC GUN

Foculpods (4pk)

Foculpods are high performance vibration absorbing supports designed to be placed under CD Players, Turntables, Amplifiers, Loudspeakers and all other Audio, Video & Computer equipment. Each Foculpod is accurately replicated from a precisely machined and polished master in order to provide equal dimensional and volumetric support.

Specifications:

- Material: Advanced polymer
- Foculpod Overall Size: 50mm x 20mm
- 4 Foculpods will support 10 kilos

MI0050	FOCULPODS (4PK)

Record Brush

Removes unwanted dust, dirt or small particles from your vinyl record whilst reducing any static charges.

Stock Code	Description
MI0135	RECORD BRUSH

Exstatic Record Sleeves

Most records are positively charged with static electricity. This positive charge attracts dust and grime to the disc groove, resulting in clicks, crackle and unwanted surface noises and also accelerates deterioration of the stylus. These sleeves safely protect the disc inside the outer sleeve, reducing the positive charge, thereby releasing the dust.

GL0205M	GOLDRING EXSTATIC RECORD SLEEVE (25 PK)

Polipods (8pk)

Polipods are high performance vibration absorbing supports designed to be placed under CD Players, Turntables, Amplifiers, Loudspeakers and all other Audio, Video & Computer equipment. Each Polipod is accurately replicated from a precisely machined and polished master in order to provide equal dimensional and volumetric support.

Specifications:

- Polipod Overall Size: 40mm x 16mm
- 4 Polipods will support 5 kilos

Stock Code	Description
MI0055	POLIPODS (8PK)

Permaclean

Cleans vinyl, cds and dvds to perfection!

Permaclean is a remarkable cleaning system that rapidly removes all contaminants from vinyl records, CDs and DVDs - from dust and grit to greasy fingerprints! Permaclean safely and quickly removes unwanted grime that causes serious background noise. Your records and discs are restored to virtually mint condition after the Permaclean treatment. When used in conjunction with Permostat it proves a most effective record/disc restorative. The Permaclean Kit includes the unique double sided Duopad and will treat approximately 40 records.

Refills are also available.

M10030M	PERMA CLEAN KIT
M10035M	PERMA CLEAN REFILL

Super Exstatic Disc Cleaner

A highly effective solution to grime and dust inside the record groove. The carbon fibre filaments and a soft velvet cleaning pad remove the unwanted materials at a stroke leaving the groove clean, prolonging the life of both disc and stylus.

Stock Code	Description
M10075	SUPER EXSTATIC BRUSH (1)

Pixall MK II

The record cleaner that really works!

The internationally acclaimed Pixall Mk II Roller has proved to be the most effective dry cleaning system yet devised for removing not just surface dust but, more importantly, damaging microdust particles embedded deep within the record grooves. The specially formulated cleaning tape is rolled over the surface of the record to pick up debris and dust, powerfully and quickly. When the roller itself becomes dirty and loses its effectiveness, simply peel back the tape to expose a fresh layer. Easy fit refills are available which hold a further 1.85m of the special record cleaning tape.

M10005M	PIXALL ROLLER MK II
M10015M	PIXALL REFILL MK II

Permostat

The simple way to eliminate static permanently!

Permostat is a unique anti-static record preservative. A single application of the fluid will completely eliminate static electricity for the average life expectancy of a vinyl record. Permostat's blend of properties not only totally eliminates static but also dramatically prolongs the life of both the record and the stylus by reducing damaging friction between stylus-tip and groove. Permostat is available in kit form, incorporating the unique double-sided Duopad. A standard size bottle of Permostat will protect 25 records.

Refills are also available
