

Radios, Docks and AV Separates

Q2's approach to Wi-Fi Internet Radio is different. It's not about bells & whistles it's about simplicity. Results from their research is overwhelmingly clear, that despite the fact we all have access to the many thousands of radio stations and channels to choose from online, we all gravitate to just a handful of our favourite stations in the end! Q2 Wi-Fi Internet Radio has no buttons or controls and has just 4 presets. To change a channel, just turn the Q2 cube on to one of its sides, 4 sides 4 channels. To raise or lower the volume, just tip the Q2 Radio up or tilt it down.

Q2 Wi-Fi Radio has changed the way in which we access the internet. Like all other Internet Receivers on the market Q2 offers you exactly the same access to choice. For the many thousands of satisfied customers that have already purchased the Q2 Wi-Fi Internet Radio one thing is coming across loud and clear, you love Q2 Radio; you love its simplicity & style, its cuteness & fun and its performance verses size. And that it's not just about having quick access to the many thousands of podcasts and radio stations from around the world, it's about having quick access to the 4 that you really love.

Q2 has become for many a window to the sounds, music and news from their home towns or country. It connects them with their favourite musical genres from all around the world. It connects them to their preferred faith and religion or sports and news. It opens up a world of traditional and contemporary children's content and so on.

From what we are hearing, it would seem that for many, Q2 has become more than a just an Internet Radio, it's become a companion. So come on and join the Q2 revolution.

"Endearing to look at, engaging to listen to and easy to use."

"Top marks for the Q2"

Q2 Internet Radio

The internet radio that is simple and fun to use, just tilt it to change station or tip it to raise or lower the volume.

"cuter than a Labrador puppy dressed as Angelina Jolie."
"the meatiest sound quality we've heard from a single speaker product"
"some cunning trickery is going on with the audio performance to make it sound much better, cleaner and crisper than a lot of radios out there, Internet or otherwise."

Pocket-lint (November 2010)

"...a truly unique product...utterly adorable...complete lack of any buttons or knobs... nothing short of genius"

TrustedReviews.com (December 2010)

"refreshingly different and interesting"
"Audio quality is very good"
"Volume is loud enough to fill a big room and there's no distortion even at maximum."
"It's incredibly easy to use long battery life the ideal choice"

ExpertReviews.co.uk (December 2010)

"packs a surprisingly loud punch for a unit of this size"
"I can't remember getting a clearer sound from a speaker this small - even at higher volumes"
"has put a smile on the face of everyone"

Gizmag (December 2010)

"Speech is clear and crisp, and music is weighty and punchy."

Stuff.tv (March 2011)
